- Tables should not be more than 4-6 and Images/ photographs not more than 3.
- The numbers of authors should not be more than 5. It may be relaxed for multi-national/ multi-disiplinary study.

Guidelines for preparation of Manuscript: Manuscript should be arranged according to the rules stated in "Uniform requirement for the manuscript submitted to biomedical journals" (Ref. Br Med J 296: 401-5, 1998). The manuscript should be presented in Standard English without any typographical error. The Author should use Times New Roman having front size 10 throughout the manuscript. The author has to give 1.5 lines spacing with before and after 0 point throughout the manuscript. No editing or material changes at the proof stage will be permitted.

Title: The title should give the to the point design of manuscript. First letter of each word in title should be in capital.

Authors: The name of all authors should be written as First name, Middle Name, Last name (Surname). The Correspondence authors need to give Institute/ College name with designation and address, postal address, Emil ID and Mobile Number etc.

Abstract: The abstract should not be exceeding than 150 words. The abstract should give overall work done throughout the text.

Keywords: The keywords should not be more than 10 and which should be selected on very careful method.

Introduction: The introduction should be brief and limited to the statement of the problem and aim of the study and the techniques employed. The drafting of introduction should be done in such a method that reader should understand the justification of the work done.

Materials and Methods: The material and methods should include relevant details on the nature of material, study design, the techniques employed, and statistical methods used. For well-known methods, citation of reference will suffice. The method should include the steps, which was follows for the selection of study subjects in a methodological stream.

Results and Discussion: The result work should include the appraisal parameters with detail description of method and results obtained. The statistical illustrations are highly attractive. The accurate and good statistical records containing manuscript will get more liking and should be produced in standard software package.

Tables: Tables should be typed on separate sheets, each with a heading. **Table** should be typed with the first letter (T) capital. All measurements should be in metric units.

Figures and Line/ Bar Diagrams: Figures should be small, simple and easily understandable. Unnecessary figures and parts of figures should be avoided, Figures/charts and tables created in MS Word should be included in the main text rather than at the end of the document. The illustrations should not repeat the data presented in tables and *vice-versa*. Text figures should be used in preference to tables. Only high contrast/ quality of figures that are essential shall be accepted and require a resolution of at least **300 dpi** (dots per inch). Line art should be supplied with a minimum resolution of **800 dpi**.

Conclusion: The conclusion should not be more than 100 words, which summarized the whole work briefly.

References: All references must be cited in the text by the reference number using superscripts. No links between superscripts in the text and actual references in the reference sections may be used. References cited should follow the style given below:

- **Reference of Research Paper:** Mohapatra SC, Mohapatra P, Singh IJ, Gaur SD. Epidemiology of gastrointestinal and respiratory tract diseases in rural area of Varanasi (India), *European J. Epidemiology*, 1989, 5 (1): 117- 122.
- **Reference of Website:** Glossary of Terms Used in Pharmacovigilance; January, 2013. Available from: [http:// www. whoumc.org](http://www.whoumc.org).
